

Home Sweet Class

Professional Development: Anytime, Anywhere

WHRO Education offers instructor facilitated online courses, hands on workshops and professional development resources designed by working educators for working educators. And, as a leader in educational technology, we are experts at helping you take advantage of the cutting edge techniques and tools that can make your classroom an engaging, interactive learning environment. After all, that's why you decided to become a teacher, isn't it?

WHRO Education, in partnership with VSTE and PBS TeacherLine[®], offers online access to more than 90 six-week long standards aligned* courses in reading, math, science, instructional strategies, social sciences and instructional technology.

Every course is eligible for graduate credit, professional development points or continuing

*WHRO Education courses meet the following standards
Virginia SOL, NETS.T, NCTM, NCLB

education credits and, because PBS TeacherLine[®] is a US Department of Education grant recipient, our courses are affordable.

WHRO's TechTrek[™] hands-on workshops and industry forums with Apple[™], Microsoft[™] and other leading educational technology vendors are packed with practical information you can put to use the very next day in your own classroom.

Our online courses have been developed in partnership with nationally recognized educational organizations:

International Society for Technology In Education
National Council of Teachers of Mathematics
Mid-continent Research For Education and Learning
Education Development Center
The Concord Consortium
University of Indiana

For more information about our courses, workshops and flexible scheduling contact Byron Walker at byron.walker@whro.org or 757.889.9447

WHRO Education. It's how you do professional development.

"The courses were very informative-especially the TECH course. I learned so much in a short amount of time and have already begun to implement some of the strategies in my classroom. I have shared some ideas with other teachers as well."

- Mrs. Kim Domin, Virginia Teacher

"I hope to take more classes from you in the future. I love this type of class-learning on my time and discussing questions with others via the computer."

- Mrs. Sarah McAnally-Harvey, Virginia Teacher
